And then also some we want to get some testimony, and, again, just clarification, on should a light be approved, what impact will that have on traffic heading eastbound on Sicomac Avenue heading towards the light backing up, if that's a red light, backing up in front of the storefronts, and would it back up and how far? And, again, that would kind of trigger what impact it might have on Mountain Avenue. So I think they're all fair questions. The other thing I do want to mention tonight and get maybe some expert opinion on it is to see if a proposed speed reduction would have an impact. It's a 40-mile an hour zone on Sicomac. It's my opinion, from the firehouse down, it could be reduced. And in thinking about it, maybe if it is reduced, will there be a positive impact to the

So we heard the testimony on the health care facility, itself, in the proposed additions to the structures, and then some minor modifications that were made to the structures as well. I think we've heard all the testimony we needed to hear on that, and then we opened it to the public, so that portion was closed. I do have one item that I had in my notes and Mr. Ten Kate, I don't mean to put you on the spot so early. There was one note I had, review of the site plan, was to be done for the lighting. MR. 07.58PM 22	MR. KALPAGIAN: Okay.	08:00PM 22	You know, they recognize that there was some wiggle
07:58PM 23	THE WITNESS: Okay. So if you can	08:00PM 23	room in their original sketch, and that they are able
07.58PM 24	imagine about, only about a third of the width of	08.00FM 24	to reduce things, and it reduces impacts and results
07:58РМ 25	that yellow. Okay.	08:00РМ 25	in a smaller footprint of the project.

significant improvement in traffic operations at that intersection.

The other benefit we get is improved pedestrian accommodations. The intersection would have crosswalks. Mr. Ascolese provided some information at previous hearings about what the county could consider in terms of modifying the signal design to provide steel poles with pedestrian signal, push buttons as part of this temporary condition. And that would afford the opportunity to provide improved pedestrian crossings and pedestrian operations at the intersection.

previously, that's the county's future plans that are 08:10PM 15 not part of the improvements that would be included 08:10PM 16 in the Christian Health Care Center's access changes. 08:10PM 17 So, again, just to touch on things, 08:10PM 18 reduces the roadway widening by 8 feet, which, the 08:10PM 19 08:10PM **20** benefits are, reduces impervious coverage, it reduces the amount of pavement, reduces soil disturbance 08:10PM 21 because you don't have as much widening, and reduces 08:10PM 22 08:10PM 23 the length of the improvements. And there was a question, I believe, 08:10PM 24 08:10PM 25 Mr. Fry, you had asked it, about the impact to the LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C. 201-641-1812

two residences, the residential properties that are 1 08:10PM 2 to the east. With reducing that widening, the width 08:10PM of the widening by 8 feet, the more easterly property 3 08.10PM is no longer affected at all. The widening and 4 08.11PM improvements on the southbound -- I'm sorry, on the 5 08:11PM south side of Sicomac Avenue formerly extended to the 6 08.11PM 7 intersection of Wellesley. 08.11PM Under the county's revised plan, they 8 would terminate about 150 feet-ish west of that. So 9 08 11PM

that easterly property would no longer be impacted. 08.11PM 10

The westerly property still would have 08.11PM 11 some driveway modifications, but with that 8-foot 08 11PM 12 08 11PM 13 reduction in width, it would significantly reduce the 08 11PM 14 amount of driveway reconstruction and any grade impacts that would result at that location. 08:11PM 15

08:11PM 16 So where does this all lead to? So the MUTCD warrants, we talked about those. There are 08:11PM 17 08.11PM 18 three that have not only been satisfied, but 08 11PM 19 thresholds have been exceeded. That is the basis for 08:11PM **20** the county's plan to signalize the intersection. 08.12PM 21

As I said earlier, the county is aware of these warrants. They have decided to act upon those and move forward with a plan to signalize the intersection.

> Signalizing the intersection improves LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C. 201-641-1812

where it is and the county signalizes the 08:13PM 2 intersection as a T-intersection. 08:13PM The Christian Health Care Center 3 08;13PM driveway where it is today is not compatible with a 4 0B; 13PM signalized T-intersection. And that was shown in the 5 08:13PM video previously testified to by Mr. Mara. 6 08:13PM Bergen County's revised plan reduces 08:13PM 7 impacts, and I think that that was one of the 8 08:13PM concerns of the board about this intersection and I 08:13PM 9 am happy to hear that the county is listening. And 08:13PM 10 08:13PM 11 just, again, a reminder, any future county

safety and operations, and I touched on that. And it 08:12PM 1 has even been supported by the board's own retained 2 08.12PM traffic consultant, Dolan & Dean, in their letter of 3 June 13, 2012, when the original plan for the 08.12PM intersection was first presented to the board, and 5 08:12PM 6 more recently by the Wyckoff Police Department and 08:12PM

the Wyckoff Fire Department.

The Christian Health Care Center new driveway access point is better than the existing. Touch on some of the points I made earlier. By making these improvements it will help remove traffic from the Mountain Avenue/Sicomac Avenue intersection, creating an unintended improvement at that location.

It will restrict all left turns at the existing Christian Health Care Center driveway on Sicomac Avenue. We talked about that. That's a safety improvement.

It will help eliminate the left turn 08:13PM 18 accidents that have occurred at that location. 08:13PM 19

> And the last point to make, and this was testified to by Mr. Mara at the previous -- his previous hearing, and there was a video simulation shown that the existing Christian Health Care Center driveway -- this is the what-if scenario. What if Christian Health Care Center keeps their driveway

We then said, well, wait a minute. 1 08 15PM What's the impact of it? So let's try to find that 2 08:15PM out. And I know there was a video, but I need 3 08:15PM somebody to kind of refresh my memory as to what 4 08.15PM exactly the impact would be. Is it too close to the 5 08:16PM light that it would cause conflict? I know we had 6 08.16PM 7 some discussion maybe about could cars then being 08.16PM impacted going in and out of the shopping center 8 because of it? So if you can --9 08.16PM THE WITNESS: The answer is -- and 08 16PM 10 Mr. Fry, you just said it, essentially it would be 08.16PM 11 too close to the intersection. If we just go back 08 15PM 12 08'16PM 13 quickly to the plan. I went the wrong way. CHAIRMAN FRY: Are those birds in 08 16PM 14 08.16PM 15 queue? THE WITNESS: Okay. If we go back to 08.16PM 16 08 16PM 17 this plan, without this driveway, the Christian 08 16PM 18 Health Care Center driveway is located right about 08 16PM 19 here, existing driveway, just off the sheet. 08:16PM 20 What was testified to previously and demonstrated to the board in the traffic simulation 08:16PM **21** 08.16FM **22** model that was presented and prepared for a video is 08.16PM 23 that the queuing of vehicles in this left-turn lane 08:17PM 24 would extend beyond the existing Christian Health Care Center driveway. And that's because what still 08:17PM 25

Health Care Center driveway being west of the strip 1 08-18PM mall and west of the gas station, my guess would be 08; 18PM no. I think there's a greater impact to the safety 08:18PM of that intersection operation because of its 4 08:18PM proximity to the signalized intersection and the 5 OR: 18PM length of the left turn queue that would back up from 6 08:18PM 08:18PM 7 that intersection. 8 So that's why I'm saying, that was my 08:18PM 9 statement for it's incompatible. It really would 08:18PM 08:18PM 10 degrade operations at that intersection and 08:18PM 11 significantly reduce safety. 08:18PM 12 CHAIRMAN FRY: So in your professional opinion, if that were the determination by the board 08:18РМ 13 and the decision by the board, would the county then 08:18PM 14 say absolutely not, we can't possibly build that? 08:19PM 15 08:19PM 16 THE WITNESS: I can't speak for the 08:19PM 17 county, but I can say, as a professional engineer in New Jersey, knowing that there are three warranting 08:19PM 18 conditions that would justify a traffic signal, one 08:19PM 19 of which being safety, and there's an opportunity to 08;19PM · 20 not just improve operations, but improve safety to 08:19PM 21 08:19PM **22** make that intersection safer for the traveling 08:19PM 23 public, I personally would be -- it would be a difficult decision for me to walk away from that 08:19PM 24 08:19PM 25 improvement.

46 1 happens with the existing driveway is campus traffic 08:17PM still is going out to Mountain Avenue if they're at 2 08:17PM the upper campus, they're still going out to Mountain 3 08:17PM Avenue, taking Mountain Avenue, turning right onto 08.17PM 5 Sicomac and then taking Sicomac to turn left onto 08.17PM 6 Cedar Hill. 08 17PM So what that does is that introduces 08:17PM more cars in that left turn bay, which then extends 08.17PM 8 9 the queue further to the west. That extension of 08:17PM 08 17PM 10 queue then blocks the Christian Health Care Center 08:17PM 11 driveway.

LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C.

Now, if that's the only driveway that the Christian Health Care Center has on Sicomac Avenue, as it operates today it would continue to operate providing all movements, all left turns and right turns. The queuing vehicles in that left-turn lane significantly impact sight distance at the existing Christian Health Care Center driveway, to the point where it would make it extremely unsafe to continue to allow left turns out or in that driveway.

So then that driveway would really not function because it would only afford right turns in and out to be the only safe move.

Would it affect the properties across 08:18PM **25** the street? Because of the location of the Christian

LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C. 201-641-1812

I can't speak for the county, but they own that intersection. They are responsible for that intersection. They are aware of these warrants. Everything that they've communicated to us is they are moving forward with a plan to signalize that intersection. CHAIRMAN FRY: Well, what I'm saying is

they go ahead and they signalize the intersection, so now they've made their intersection safer in their minds, but now you've created another conflict because now you have a driveway right there that's a main driveway.

THE WITNESS: Right, but that conflict can be resolved by relocating the Christian Health Care Center's driveway to the intersection.

CHAIRMAN FRY: I understand that.

THE WITNESS: I know. I mean, that's the best I can offer you. I mean, that would be the logical solution to address the problem.

CHAIRMAN FRY: Mr. Ten Kate.

MR. TEN KATE: When you say you're going to -- the new intersection would lessen the impact on Mountain Avenue, is that just a projection of how many employees may use the signalized intersection, or is it going to be a directive or

Somehow we overlooked that last time. Maybe a little overzealous. Can you talk to what the proposed, on the revised as-submitted plans, the signage, the size, the location, just to make sure they're out of the sight lines from traffic, and any illumination? MR. KARLE: Yes. Yes. And I'm not prepared to show you a graphic, unfortunately, because I didn't know that was going to come up tonight, but we are proposing two signs; one near the new entrance intersection. It will be a ground-mounted stone attractive landscaped-type sign, similar to the one that you've probably seen out there existing. 1 in the room, and that is the traffic light. Because 09:07PM I don't believe anybody would object to this change 2 09 07PM in access if the county did not require that a 09.07PM traffic light be included as part of the project 4 09.07PM which is proposed by the Christian Health Care 09.07PM 5 6 Center. 09:07PM Just think about the change of the 7 09.07PM 8 access from one point to the other. It is safer, 09:07PM 9 more convenient, it takes trucks off the roadway, 09;07PM 09.07PM 10 takes employees off the roadway, takes the construction off the roadway, provides for an easy 09.07PM 11 access, alleviates congestion at Mountain Avenue and 09 07PM 12 09.07PM 13 Sicomac Avenue, has been endorsed by the fire 09 07PM 14 department and the police department. 09 07РМ 15 In your own traffic consultant in its 09.08Рм 16 report, and I took it out and I thought it would be 09:08РМ 17 worth mentioning. This is a report of June 13, 2012, from Dolan & Dean. And I'd just like to read some 09 08PM 18

> "To be discussed in a separate section, intersection improvements including widening and formally designating separate left and right turn lanes at the approach, combined with the intersection of a traffic signal, will not only vastly improve operations and

90

enhance levels of service, but will also provide a significant safety benefit by virtually eliminating the current challenges found under the stop sign condition."

That's your expert.

Went on: "To address these chronic operating constraints, Bergen County has directed the applicant to prepare intersection improvements that would provide a substantial benefit to safety and operating conditions as compared to the current configuration."

And then it says, "Although not specifically identified in the Stantec study, the construction of a new traffic signal at Cedar Hill Road will create regular breaks or gaps in passing traffic on Sicomac Avenue. One indirect benefit of traffic signal installation is that the operations often improve at nearby intersections due to the routine gaps provided by the adjacent traffic signal. Because these gaps are introduced on a cyclical basis by virtue of the traffic signal, motorists at adjacent intersections would have additional opportunities to turn that do not currently exist."

LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C. 201-641-1812

1 Now, that's your traffic consultant. NG-10PM That's not coming from Stantec. It's not coming from 2 09:10PM me. It's something that was more than independent, 3 09:10PM it was advice given to you, you don't have to follow 4 09:10PM it, but it is consistent with your police department, 5 09:10PM your fire department and every bit of testimony that 09:10PM 6 you've had. 7 09:10PM 8 So the question really is not should 09:10PM the intersection be created. The question is are you 9 09:10PM prepared, in the face of all of that, to simply say 09:10PM 10

we don't want the benefits because we simply don't want a traffic light. And the guestion is what has 09.10PM 12 09:10PM 13 occurred in the interim. If you'll recall when we first came here with this intersection, we indicated 09:10PM 14 09:10PM 15 that the county -- this was back in 2012. The county 09:10PM 16 mandated a light here.

And when we went through the process and you finally gave approval, albeit with the existing access, we indicated to you that we were going to back to the county with it and we were going to be an advocate for what you approved. And we did that. And what came out of it after a hiatus of five years, we came back with the county saying we will not give up on the light because of the various basis 09:11PM 25 that we have indicated, the warrants and whatever,

LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C. 201-641-1812

1 putting aside all that technical detail. County said we want a light here and there's going to be a light 2 here. 3

So what did we, at the Christian Health 09:11PM Care Center, attempt to do? We attempted to create a 5 09:11PM 6 circumstance whereby our project could move ahead, 09:11PM 09:11PM 7 the county could get its light and it would accommodate the interests of the township with 09:11PM 09:12PM 9 respect to it.

Now, as I recall, all of the objection 09:12PM 10 to the light when we had the original hearings, it 09:12PM 11 09:12PM 12 wasn't with respect to the light itself, it was with 09:12PM 13 respect to the -- what the light did to the 09:12PM 14 intersection. It created, and the comment was it 09:12PM 15 created an intersection that wasn't consistent with 09:12PM 16 the Sicomac section of Wyckoff. It was more attuned 09:12PM 17 to someplace else.

> So what did we at the Christian Health Care Center attempt to do? We attempted to alleviate that issue by doing what? Moving all of the widening onto our side of the roadway, taking it away from the opposite side so that the existing businesses would not be affected. What did we do as a result of that? We came back and we got the county to agree that the improvements on the other side of the roadway would

And your comment may be, well, how can the county do it if it's incompatible with the

2

current access? And it's quite simple. The county 3

simply has the right, because it's a county road, 4 09.14PM

> Sicomac, to simply say right turn in and right turn 5

out from your current driveway. They have the right 6

7 to do that when they put the light in. And

therefore, you cannot make a left-hand turn out of 8

9 that. 09 15PM

09:14PM

09 14PM

09:15PM

09:15PM

And what would be the consequence? The 09 15PM 10 09.15PM 11 consequence would be that you will push traffic out

09.15PM 12 onto the Mountain Avenue exit from the upper campus

and you will just make things worse at the Mountain 09.15PM 13

09.15PM 14 Avenue intersection. The county has a right to do

09.15PM 15 that. The law is quite clear. You can ask your

09:15РМ 16 Counsel. As long as you have other access, they have

09:16PM 17 a right to restrict the turn movements in or out of a

09:15PM 18 driveway.

09 15PM 19 And they have already told us that. If the driveway stays where it is, they will make it 09:15PM 20

09:15PM 21 right in and right out so it's compatible with the

light and you will now introduce more traffic onto 09:15PM 22

Mountain Avenue. That is not a threat by the county, 09.15PM 23

it is a reality. It's what they've done in other 09 16PM 24

09.16PM **25** places. It's what they have a right to do.

light. We've got you some control over the light. 1

They have reduced the scope and width of the roadway. 09:17PM 2

They have agreed that a more permanent light and the 09:17PM

effect on the property across the street will not 4 09:17PM

occur without the township's agreement, so that you 5 09:17PM

have an input, which you will not have and you would 6 09:17PM

7 not have if you deny this application because then 09:18PM

the county doesn't have to make any agreement. It 8

09:18PM

09:18PM 9 can go ahead and do, through its design, whatever it

wishes to do. It has constrained, itself, in an 09:18PM 10

effort to accommodate the interest of the township. 09:18PM 11

MS. YUDIN: Can we poll the board to see how everyone feels about the 8 feet or not the 8 feet? CHAIRMAN FRY: Could we leave it so that the condition would be they could not exceed that; however, if they wanted to move forward with the reduced, that is a viable alternative? It just couldn't exceed this. The bottom line is if we're okay with this, then if they did less, they did less. VICE CHAIRMAN RUEBENACKER: I think we should just take the 8 feet. MR. KALPAGIAN: On what basis are you taking the 8 feet? What's the basis for taking justifying to squeeze it, other than it maybe makes somebody feel better that it's not as invasive? CHAIRMAN FRY: I think that's my concern. We don't have anything concrete to base
