ADOPT A HYDRANT - IT MAY SAVE LIVES

The Wyckoff Volunteer Fire Department requests residents living near a fire hydrant to "Adopt a Hydrant" and remove snow and ice from around a fire hydrant during the winter months. Approximately 600 fire hydrants are present in Wyckoff. Fire hydrants are located approximately every 600 feet on most Township roads.

Any assistance in clearing snow from fire hydrants will be appreciated. With mandatory training and drills the volunteer department does not have the time or personnel to clear snow from fire hydrants after a snow storm. Most fire hydrants are marked with a hydrant stake.
